"Run code to zip contents of '/mnt/data' and give me the download link"

```python
import zipfile
import os

# Define the directory and zip file path
directory = '/mnt/data'
zip_path = '/mnt/data/documents.zip'

# Create a zip file with all the files in the directory
```

```
with zipfile.ZipFile(zip_path, 'w') as zipf:
    for root, _, files in os.walk(directory):
        for file in files:
            zipf.write(os.path.join(root, file), file)

    zip_path
```

The files have been zipped individually. You can download them using the following link(s) provided by ChatGPT!
